

Inert IED Circuit Boards Kit – ICK2000

Accurate: Density, X-Ray, Z_{eff}

Technology: mmWave, Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems

DSA is a DHS/TSA-accepted supplier.

The Inert IED Circuit Boards Kit, International is a one-of-a-kind teaching aid that contains a complete array of IED firing circuits to help familiarize security officers with examples of IED circuitry and different types of functioning devices.

Circuit boards are visually detailed and X-ray correct to help students readily identify the critical components of an IED. This approach allows the screener to build situational awareness of what different threats can look like in person and in the X-ray from many angles. The explosive simulants in this kit are density, Z_{eff} , and X-ray correct to replicate the real threats with which they are associated.

Quantity	Part Name	Part Number
Inert Explosive Device Circuits		
1	Inert Pressure Pad Switch	ICK1025
1	Inert Mousetrap Switch	ICK1100
1	Inert Clothespin Switch	ICK1150
1	Inert Wireless Doorbell	ICK2200
1	Inert Vibration Anti-Movement Switch	ICK2250
1	Inert Magnetic Reed Switch	ICK3300
1	Inert RCIED Cell Phone	ICK3350
1	Inert RCIED Radio	ICK4400
1	Inert PIR Motion Sensor	ICK5500
1	Inert Homemade Pressure Switch	ICK5550
1	Inert Micro Switch (Pressure/Pressure Release)	ICK6600
1	Inert Electronic Time Delay (Minutes)	ICK6650
1	Inert Improvised Tilt Ball Switch	ICK7700
1	Inert Electronic Time Delay (Hours)	ICK7750
1	Inert Mechanical Time Delay (Hours)	ICK8800
1	Inert Mechanical Time Delay (Minutes)	ICK8850
1	Inert Homemade Vibration Switch	ICK9900
1	Inert Mechanical Altimeter Switch	ICK9905
1	Inert Electric Temperature Switch	ICK9915
1	Inert Mechanical Temperature Switch	ICK9920
1	Inert Mercury Tilt Switch	ICK9925
1	Inert Light-Sensitive Photocell	ICK9930
1	Inert Wire Loop Switch	ICK9935
1	Inert Non-Electrical Firing Display	ICK9950
