

Inert Threat Screening Kit (International) – TSK1000i

ITAR Compliant

Accurate: Density, X-Ray and WTMD, Z_{eff}

Technology: Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems, mmWave

Approvals: DSA is a DHS/TSA qualified vendor list (QVL) provider for training aids.

The Inert Threat Screening Kit (International) is designed to be an accurate representation of the wide variety of threats most likely to enter security checkpoints around the globe. Inside the provided carrying case are various types of knives, grenades, pipe bombs, firing circuits, dynamites, plastic explosives, low explosives, blasting caps, and other miscellaneous inert threats, totaling over 65 items. Using these items, instructors have the ability to continually build new devices to present to students, covering all major threats seen in security checkpoints. As with all DSA simulants, these items are density, Z_{eff} , and X-ray correct to the real threats with which they are associated.
