

Inert IED Training Display Board – TSK1062

Accurate: Density, X-Ray, Z_{eff}

Technology: mmWave, Portable X-Ray, Backscatter, Computed Tomography (CT), Single and Multiple X-Ray Generator Systems

DSA is a DHS/TSA-accepted supplier.

The training display board features 24 inert circuit board training aids that represent a wide variety of blasting caps, explosive materials, switches, and power sources. Each inert circuit is configured to mimic a real circuit that could be detonated. The boards are removable from the main display and can be run through an X-ray.

All of the IED components are exactly X-ray correct, including the explosive simulants. Weighing 135 pounds and measuring 4ft by 6ft, this display board can only ship via special freight arrangement.

Quantity	Part Name	Part Number
Improvised Explosive Device Circuits		
1	Inert Pressure Pad Switch	ICK1025
1	Inert Mousetrap Switch	ICK1100
1	Inert Clothespin Switch	ICK1150
1	Inert Wireless Doorbell	ICK2200
1	Inert Vibration Anti-Movement Switch	ICK2250
1	Inert Magnetic Reed Switch	ICK3300
1	Inert RCIED Cell Phone	ICK3350
1	Inert RCIED Radio	ICK4400
1	Inert PIR Motion Sensor	ICK5500
1	Inert Homemade Pressure Switch	ICK5550
1	Inert Micro Switch (Pressure/Pressure Release)	ICK6600
1	Inert Electronic Time Delay (Minutes)	ICK6650
1	Inert Improvised Tilt Ball Switch	ICK7700
1	Inert Electronic Time Delay (Hours)	ICK7750
1	Inert Mechanical Time Delay (Hours)	ICK8800
1	Inert Mechanical Time Delay (Minutes)	ICK8850
1	Inert Homemade Vibration Switch	ICK9900
1	Inert Mechanical Altimeter Switch	ICK9905
1	Inert Electric Temperature Switch	ICK9915
1	Inert Mechanical Temperature Switch	ICK9920
1	Inert Mercury Tilt Switch	ICK9925
1	Inert Light-Sensitive Photocell	ICK9930
1	Inert Wire Loop Switch	ICK9935
1	Inert Non-Electrical Firing Display	ICK9950
