

Inert Air Cargo Threat Kit – TSK4000

Accurate: Density, X-Ray and WTMD, Z_{eff}

Technology: Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems, mmWave

DSA is a DHS/TSA-accepted supplier.

The Inert Air Cargo (CCSP) Threat Kit was designed with cargo and transportation operations in mind. This kit exceeds the performance and capabilities of the current TSA/FAA modular bomb kit. We believe there are no other products on the market that offer the capability and complete functionality this kit provides. The explosive simulants in this kit are density, Zeff, and X-ray correct to replicate the real threats with which they are associated.
