## 3-Gun Test Kit – TSK7100

**Accurate:** Density, X-Ray and WTMD,  $Z_{eff}$

**Technology:** HHMD, WTMD, Portable X-Ray, Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems

**Approvals:** DSA is a DHS/TSA qualified vendor list (QVL) provider for training aids.

The 3-Gun Test Kit is designed to maintain and improve the security of federal buildings, courthouses, correctional facilities, and public buildings, as well as any other secure facility. Inside the case are three test objects labeled as NA-22/TKC0052 (NAA-.22 revolver), DA/TKC0138(Derringer Model 95), and BR/TKC0511 (similar to the Beretta Jetfire 950 or FIE Titan .25). These test objects allow for the configuration and testing of any metal detector, allowing you to determine a machine setting that will detect your most dangerous metallic threat. Each test piece is cast in durable resin to minimize any safety concerns when conducting covert testing.

# DSA Detection®

This kit is particularly effective for testing operator alertness and training new operators. The TSK7100 complies with NIJ Standard-0601.01 "Walk-Through Metal Detectors for Use in Concealed Weapon and Contraband Detection".

There are no bullets included in this kit. It is considered a training or test piece and as such is not labeled as "INERT".

3-Gun Test Kit Contents		
Quantity	Part Name	Part No.
